RECENT PROJECTS

Simple Simon Game, *Designer/Developer*

Built using JavaScript and styled using HTML and custom CSS. Based off of the Simon Says game. One out of four colors plays randomly and will add a new color after the user correctly presses the color sequence shown.

ShoeLaLa, *Designer/Developer*

Built by a team of two using PHP and styled using Bootstrap and custom CSS. An Ad-Lister that allows a user to post and edit an add, manage their account, log in and out, and browse all shoes or by category.

Cooking on the Fly, *Designer*

Built by a team of three, I focused on Front End using JavaScript, Bootstrap and custom CSS. This is a reverse recipe finder website that allows the user to find recipes using only ingredients they have on hand.

WORK EXPERIENCE

boomtime, *Website Specialist/ Account Manager* (February 2016 - October 2016)

- Collaborated with web developers to optimize front-end in WordPress to meet client needs.
 - Led and managed 200+ clients through website building process.
- Fulfilled tickets and client requests for website changes.

SKILLS

Front End - JavaScript, jQuery, AJAX, CSS, Bootstrap, HTML, and API integration

CMS - WordPress

Software - Sequel Pro, Sublime Text, Atom
