linkedin.com/in/coding-carlos | github.com/CarlosSoto93

Full-stack developer dedicated and committed to creating websites that are both user friendly and efficient. Always looking to refactor for the cleanest code. Constantly seeking to learn the most up to date and in demand programming skills such as NodeJs, AngularJs, React and Redux.

PROJECTS

FixItHub July 2017

Users may sign up and request service on an appliance and will get results from matching service men that have signed up. This site will store customers appliances, service records, reviews, comments and more.

Ad Lister June 2017

Used Java and MySQL to create a Craigslist clone that allows users to register for the site, post and view ads.

Simple Simon May 2017

Memory game that uses JavaScript and JQuery to create the functionality for this game to work. A pattern is generated for the user to repeat until fail.
