Technical Skills

HTML CSS JQuery JavaScript Bootstrap Java EE Java SE MySQL Spring Git with VCS Paired Programming Thymeleaf Test-Driven Development Object-Oriented Programming

Development Projects

Trace- Trace is a capstone project that was built by pair programming using Java, Spring, Javascript, HTML, and Tailwind CSS. Trace allows for a user to sign up and save job positions that they've applied for or are planning to apply to. The saved jobs stores and displays information such as the location, stage in the hiring process it's in, point of contacts, salary, etc. Github- <https://github.com/TraceCapstone/Trace>

Adlister- A pair programming project built using java and mysql. Servlets and, jsp, and DOA was used in order to make a registration and login page. Once the user logs in, they are allowed to create an ad, edit an ad or user, delete an ad, search an ad, and see other ads that other users have created. All the ads and users are stored in a database. Github- <https://github.com/Muniz-Phillips-Parker/group-java-adlister>

Contacts manager - A project built using Java with functionality that allows for the user to be able to delete, add, search, and display their contacts. When the user is done, the user has the option to exit out of the application. Github- <https://github.com/jordysolis96/Personal-Contacts-Manager>

Coffee project- A pair programming project built using HTML, CSS, and JavaScript. Project allows a user to edit, add, delete, and browse through a list of coffees. The search bar was made to cut out any coffees that don't match characters typed into the search bar. Github- <https://github.com/Jordy-Will/coffee-project>
