A Software Developer with previous experience in implementing creative business solutions. Using those creative solutions coupled with my experience as a Software Developer, I bring a unique perspective of looking at both sides of the business unit. My drive for creating customer-focused solutions ignited my transition into software development. My goal is to continuously increase my technical knowledge and strive to contribute to challenging software projects that can aid in all facets of business strategies and everyday life functions.

Technical Skills

HTML CSS JQuery JavaScript Bootstrap Java EE Java SE MySQL Spring Git with VCS Paired Programming Thymeleaf Test-Driven Development Object-Oriented Programming Tailwind SQL

Development Projects

Trace- Trace is a pair programmed capstone project built using Java, Spring, Javascript, HTML, and Tailwind CSS. A user can sign up and save job positions that have already or planned to apply to. The saved jobs stores and displays information such as the location, stage in the hiring process it's in, point of contact, salary, etc.

Adlister- A pair programming project built using java and mysql. Servlets, jsp, and DOA were used in order to make a registration and login page. A user can create/edit/delete/search an ad, and see other user created ads.

Contacts manager - A Contact managing application built using Java with functionality that allows for the user to be able to delete, add, search, and display their contacts. When the user is done, the user has the option to exit out of the application.

Coffee project- A pair programming project built using HTML, CSS, and JavaScript. A user can edit/add/delete/browse through a list of coffees. The search bar filters out coffees not matching typed characters.
