

Lening A. Rodas

Software Developer

Software Developer with a strong understanding of the fundamentals of object-oriented programming, debugging, and development in both statically typed and dynamically typed programming languages. Five years in the Marine Corps have built upon my attention to detailed-oriented work, leadership, teamwork, real-world problem-solving, which serve me during my transition into Software Development.

Technical Skills

HTML, CSS, jQuery, JavaScript, Bootstrap, Java SE, Java EE (Servlets, JSP), Test-Drive Development, MySQL, Spring Boot Framework, Object-Oriented Programming, Paired Programming, Thymeleaf, VCS with Git

Development Projects

Helping Hand

Helping Hand is a paired programming project that allows users to either put an item up for donation or request for an item that's needed. Users can create an account with a role, have full CRUD functionality with item request and donation posts. Helping Hand is an MVC application built with Java, Spring Boot, MySQL, HTML, SCSS, and JavaScript.

Adlister

A Paired-Programming project that utilized Java EE to create a Craigslist like page, where a user is able to register, login/logout, as well as create, edit, delete ads.

Contact Manager

A Paired Programming project which created CLI (Command Line) Application to keep track of contacts. The project written in Java, allowed the user to add and remove contacts.

Movie Project

A project focused on Paired Programming that involved NPM, JS, HTML, Bootstrap, and CSS to generate a webpage that allows a user to add, edit, and remove movies from a movie list.

WeatherMap Project

Solo Project used API AJAX with jQuery, Vanilla JS, HTML, and CSS. Project was to create a website that allowed a user to get a 5-day forecast via search input and by clicking anywhere in the world using MapBox API while using Open Weather API to provide real-time weather data.

Coffee Project

Project focused on Paired Programming that involved HTML, CSS, and JS to generate a mobile responsive webpage that allows a user to add, edit, filter, and remove coffees from a coffee list.
