ANTHONY VIDAURRI
Software Developer

Emerging software developer with a background in customer service providing a strong skill set in problem-solving, adaptability and communication. Experience in driving customer satisfaction combined with a passion for technology has inspired a transition into software and web development. Looking forward to contributing to a collaborative team environment while producing efficient and reliable code.

Development Projects

Trace
App that allows users to track their job applications by adding, removing, editing their applications and an option to upload resumes. Users can also keep track of any important points of contact for multiple jobs. The project was built utilizing agile development amongst a group of four members. It is built using spring boot, tailwind, html, thymeleaf, javascript.

Weathermap Frontend Application
Application that allows users to enter their location and receive the forecasts for the week along with a detailed forecast for the day. This project utilizes HTML, CSS, Javascript, MapBox API, Node Package Manager, OpenWeather API, and jQuery.

Adlister Project
Project focused on creating a webpage that utilizes MySQL and Java. Purpose was to replicate and Ad webpage, where the user can create profiles, securely log in, view, create and edit ad listings.

Movie Project
This app involved the use of NPM, JS, HTML Bootstrap, CSS to generate a webpage that allows a user to add, edit, and remove movies from the movie list.

Coffee Project
Project focused on Paired Programming that involved HTML, CSS, and JS to generate a webpage that allows a user to add, edit and remove coffees to the coffee list.
