[GitHub/JayaSeyyadri](https://github.com/JayaSeyyadri)

Professional educator whose passion for technology and cultivating positive customer experiences inspired a move into web development. Had a career in logistics while living in India and during the transition to the United States rediscovered my love for computers through codeup. Looking forward to a career centered around creating software solutions that fulfill customers experiences thereby leading to business growth

Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

Capstone Project

Full-stack web application built with Java, Spring Boot, MySQL, HTML, CSS, JavaScript, and jQuery

Comrade Snifter

A 3 team web application for socializing over drinks. A visitor can view the top 3 drinks on the landing page and register for an account. A user can log in, create drinks, edit drink information, rank favorite drinks, and an administrator can view users & manage users as well as drinks.

Movie Application

A team peer programming project is a single-page application that implements HTML, Bootstrap, JavaScript to interact with RESTful API. It enables a user to add new movies, edit existing movies, and delete movies.

Contacts Manager

A team peer programming project that uses Java. It gives a user the ability to view contacts in a text file using a file Reader, add a new contact, delete a contact, search for an existing contact and exit the application based on the user's choice
