Development Projects

[Intellifridge](#)

This capstone project is a Spring Boot web application that tracks the contents of any potential user's fridge, along with the expiration date of each food item. The back-end was written primarily in Java while the front-end utilized HTML, CSS, and JavaScript.

[Ad Lister Project](#)

The AdLISTER Project is a Craigslist style web application that lets users perform CRUD operations. It was written in Java, and conformed to the MVC design pattern. It used Servlets with JSPs, JDBC, and MySQL. This was a group project..

[Weather Map API Project](#)

Built a JavaScript application that gave a 5 day weather forecast for the area that the user searched or clicked on the map using both the Mapbox API and OpenWeatherApp API. This was a solo programming effort that was built using HTML/CSS/Javascript/jQuery.

[Movie DataBase](#)

Utilized the OMDb API with JavaScript, to allow users the ability to search, add, edit, and delete their own personal movie list.
