Ignacio Mares

Software Developer

Passionate Full-Stack Software Developer and former Sales Manager with experience in conflict resolution, leadership, communication, teamwork, client side resolution and planning. Experience in the telecommunications industry has developed my ability to work in challenging fast paced environments while meeting quota driven goals. My natural curiosity to learn and detail-oriented nature has given me appreciation for technology and has inspired the transition into full-time web and software development. Looking forward to the opportunity to leverage my experience and technical skills to build a career motivated by creativity and passion.

Development Projects

IKnowASpot
Capstone project that allows users to interact with a map to add favourite spots around town. We integrated a MapBox API to allow for a more seamless feel when adding your spots on the map. Adding markers to your desired spots and allowing the user to add events on the spots gives this user experience a full and satisfying functionality. The team leveraged Bulma to integrate a calendar to schedule events and set start and end times. Stack used: Java Spring, Thymeleaf, jQuery, CSS, HTML, Bootstrap, MapBox, JavaScript.

WeatherApp Project
Using the API Mapbox to allow users to search a location on a functional map and see a forecast for the weather. Users are given the ability to drop a marker instead of entering a location and get the same forecast result. HTML, css, JavaScript, Mapbox API.

Ad Lister
Java app that allows a user to display and add posts to a web page. Users are allowed to make new posts, edit and delete their ads. In this Craigslist mock we allow the user to fully navigate the app using Java, JSP, servlets, MySQL and JS.

Contacts Manager Project
Java program that allows a user to see a menu index and allows the user to select different options such as view contacts, add new contact to directory, search directory for contact, and delete contact. Java, JavaScript, JQuery.

Professional Experience

Ignacio Mares - AT&T
Sales Manager / Oct 2013 - Jun 2021

- Sales manager responsible for setting meetings with clients and providing attention to detail while offering a complete solution
- Trained new hires, developed staff through coaching and mentoring, and delegated specific duties as needed
- Responsible for maintaining and logging inventory and meeting monthly quotas

Ignacio Mares - Clear Talk
Sales Manager / Oct 2012 - Oct 2013

- Managed daily front of house operations and maintained location inventory
- Collaborated with a teammate to create a training manual that was implemented across the west Texas sales area
- Tracked and consistently met quotas by diligently managing the sales process, setting goals, and motivating employees to meet targets
