Certificate of Completion
Jun 2021 - Jan 2022

A fully-immersive, project-based, and intensive 22-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.

Full Stack Web Developer with a focus in HTML, CSS, and sundry styling. Excellent communication skills with a background in HR and staffing. Leadership skills acquired from training new hires and managers in essential standard work practices. Quick learner with all forms of computer tech and coding languages. Problem solving mindset affords zero frustration and an easy workplace environment.

Development Projects

[CitySites](#)

CitySites is for those looking for more to do in the great city of San Antonio and soon, a city near you! CitySites is a Full-Stack Web application that utilizes JavaScript, HTML, CSS, and Java with SpringBoot framework. Powered by Google APIs and the great minds of the CitySites development team, you, the user, will be able to find fun activities, save your favorite places, and even add your own activities. CitySites will show you where to go!

[Movie App](#)

Fully functional application that took api data and made a visual for the user to select movies, add movies to data and delete movies. Utilizes Javascript, HTML, JQuery, Bootstrap, Ajax and CSS elements.

[Coffee Menu App](#)

Dynamically generated coffee menu with the ability to add additional coffees and full styling. An online menu for a coffee shop. Allows the user to search for different types of coffees from a list or add a special coffee to the list as well as delete coffees. Utilizes Javascript, HTML, Bootstrap and CSS.

[Weather app](#)

Full integration of free weather API and MapBox API with interactivity for finding locations with a search bar and marker. Shows the weather of a selected area on the interactive map and allows searching of new areas with updated weather. Languages used include HTML, CSS, Bootstrap, Ajax and JQuery.
