Control with Git, Paired Programming

## Education

### Codeup

Certificate of Completion  
Jun 2021 - Jan 2022

A fully-immersive, project-based, and intensive 22-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.

Software developer with a stable work history in technical sales and customer account management. The opportunity to pivot and transition to a new field has provided a chance to pursue a career where a passion for technology and helping others could combine. Excited about entering a field with growth and endless possibilities and finding ways to leverage my passions to help your company continue to grow and thrive.

## Development Projects

### [BookAlert Capstone Project](#)

BookAlert is a web app that lets users keep track of new releases by their favorite authors, and receive email notifications for new and upcoming releases. Users can save books, and keep track of books that have been purchased. It conforms to the MVC design pattern, and uses Java, Spring Boot, Hibernate, jQuery, Fetch API and jQuery. This was a group project.

### [AdLister Project](#)

The AdLister Project is a Craigslist style web application that lets users perform CRUD operations. It was written in Java, and conformed to the MVC design pattern. It uses Servlets with JSPs, JDBC, and MySQL. This was a group project.

### [Weather Map Project](#)

The Weather Map Project is an interactive web application that displays a map and the 5-day weather forecast. It has search box capability and the option to drag and drop the map marker to new locations, which will update the 5-day forecast in real time. This was a solo project that utilized the Open Weather and Mapbox APIs. It was written with a combination of jQuery, AJAX, and Bootstrap CSS.

### [The Movie App](#)

This website allows the user to add, edit, and delete movie information on a server, and was built using jQuery, the Javascript Fetch API, and Bootstrap CSS. This was a pair programming project.

### [Contacts Manager CLI Application](#)

This is a contact manager app written in Java. It allows users to show, add, search and delete contacts. This was a pair programming project.

## Professional Experience

### Harrington Industrial Plastics - San Antonio, TX

*Senior Inside Sales / Aug 2004 - Apr 2021*

- Trained new and existing employees for the inside sales position
- Handled several key accounts while maintaining ongoing relationships in the pipe, valves, and fittings industry for San Antonio and Austin TX
- Made contact with decision makers for several projects that led to our company being awarded new business
- Assisted customers in the selection of the proper products for their applications
- Provided support and troubleshooting to customers with technical issues they were having in the field
- Compiled bid packages for upcoming construction projects, and maintained communication with key decision makers for those projects in order to win business
- Worked with vendors and shipping companies to provide customers with accurate delivery dates, and logistics
