Highly skilled in end-to-end SDLC and effectively registered unparalleled customer satisfaction levels. Adept at implementing strategies to execute key project deliverables & deliver compelling business value to clients.

Development Projects

[BookAlert API Capstone](#)

BookAlert is an MVC application built using Spring framework. It allows users to keep a record of their favorite authors saved to MySQL database and update upcoming titles based off of their list of authors using Java and jQuery. Dynamically rendered HTML templates to bind database information to the view. Implementation of Java REST template to simplify RESTful API object to streamline data.

[Movie Database API](#)

A single page application that allows users to edit, add, and delete movies, as well as rate them. Incorporated a json-server for a mock database and a backend. This was a Paired Programming Project.

Environment: RESTful API, JavaScript, HTML5, CSS, Materialize CSS, jQuery

[OpenWeatherMap API](#)

API Weather application displaying the current and 5-day forecast for any city provided by search. Dynamic UI that enables when a user navigates by Map pin and search criteria.

Environment: JavaScript, HTML5, AJAX, MapBox, CSS, Bootstrap, jQuery

[Fancy Coffee Company](#)

Updated and improved functionality for Coffee Company Project. Enabled user friendly experience by filtering Coffees by name and displaying only the provided search term. Created submission form for new roasts and blends. This was a Paired Programming Project.

Environment: JavaScript, Bootstrap, CSS, HTML5
