 [GitHub/carloschavira333](https://github.com/carloschavira333)

Software Developer leveraging previous Agile management processes in enterprise wide projects across DoD clients in Navy Medicine, Army IMCOM, and Veterans Affairs. As I continue to grow in the technology space I hope to weave my knowledge of business logic in large scale systems into the requirements stages of an application.

## Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

## Development Project

### [Clean Plate Donations](#)

A web application that uses Spring, Thymeleaf, and MySQL. Clean Plate Donations is the conduit between Restaurants who have food to donate and Non-Profit organizations who need food. Non-Profits will be able to post a listing requirement such as 10 loaves of bread and if a nearby restaurant is able to fulfill they will contact the Non-Profit. Technology utilized: Java EE, Spring Boot, Hibernate, HTML, CSS, and JavaScript.

### [Padlister Project](#)

Airbnb(ish) web application offering rooms for rent. What sets my application apart is that we offer amenities such as coffee, laundry service and a driver. Additional Features: Users can register, login, update email and password, and search rooms by city. Technology utilized: Java EE (servlets and JSPs), HTML, CSS, and JavaScript.

### [Weather Map Project.](#)

A global weather application providing both real-time and a 5-day weather forecast based on user geolocation. Additional features include: map navigation and pin placement. The data management for this project was accomplished with API requests, AJAX, jQuery. For the front-end we utilized bootstrap, CSS, JavaScript.

### [Movie Project](#)

A web application that allows users to perform the following actions: search, add and delete movies. The data management portion is handled via an API backend with Javascript handling the requests.

### [Coffee Project](#)

A web application that allows users to search for favorite coffee blends as well as add their own favorite coffee blend. This app housed a local JSON backend. The requests were handled via Javascript and the page refresh was handled by jQuery.

## Military Experience

### U.S. Navy

*Program Manager* / Nov 1995 - Dec 2014

- Oversaw the development and implementation of program strategies, policies, and objectives; resulted in 100% Readiness score and made the organization available to surge deploy at a moment notice.
- Prepared the administration budget, review process, and managed organization goals and risk; led to centralized cross-departmental budget talks to set common organizational goals and mitigate risk.
- Performed quarterly need assessments analysis and review of individual programs and overall effectiveness; allowed for the identification of gaps and set goals to address the gaps in a timely manner.
- Produced risk management reports for every life-cycle stage of the organizations' program offerings; enabled departments to plan against the red and yellow areas as well as request for support ahead of time vs just in time.

## Professional Experience

### **Accenture Federal** (through Sparks Group) - San Antonio, TX
