

Emilio Benavides

Software Developer

 (830) 591 9756  emilio.benavides68@gmail.com  [LinkedIn/EmilioBenavides](https://www.linkedin.com/in/EmilioBenavides)  [GitHub/EmilioBenavides](https://github.com/EmilioBenavides)

Software Developer with a Bachelor of Science and experience in sales and facilities management. A natural interest in technology coupled with the desire to have a family sustaining career led to the decision to transition into web development. Technology has the power to make a positive impact on the lives of humans and I look forward to joining a company where I can contribute clean code to projects focused on changing lives for the better.

Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

[Pet-Adoption Project](#)

This application provides listings of pets in a specified radius from the user's location. The user can view the listings as a guest or registered user. As a registered user, one can post your own pet listing including name, type of pet, gender, color, health, description, summary and even upload a photo of the pet. One can also edit the listing and related fields. This was a group project of four, utilizing HTML, Java, Spring Boot, MySQL, HTML, CSS, JavaScript, jQuery, Bootstrap Framework, Spring Security, Amazon S3, Talk JS, Google Distance Matrix, Google API, and Thymeleaf.

[Movie Project](#)

Generates a list of movies based on user inputs. If a movie is available the query will bring up an icon with information regarding title, year made, rating, length of film, poster, and IMBD ratings. The main page utilizes CSS keyframes to imitate movie lights. This application allows one to search, add, and edit the movie list. This was a paired project utilizing HTML, Javascript, JQuery, CSS, and AJAX to receive JSON data.

[Comic-Sans-Coffee-Project](#)

This is a coffee shop application that allows the user to view a selection of coffee brews and choose based on name or roast type. The user can also create a custom coffee based on roast and caffeine amount desired. This project utilized HTML, Javascript, Bootstrap Framework, and custom CSS.

Professional Experience

Environmental Improvements - Spofford, TX

Ranch Manager / May 2017 - current

- Managed 8,000 acre ranch corporately leased by Environment Improvements. Ranch was specific to wild game hunting and Whitetail deer.
- Perform troubleshooting over the phone for customers to mitigate damage and minimize costs until repairs could be properly assessed and made
- Maintained and filled feeders and watering holes across the property.
- Procured fuel for all vehicles and feed for all feeders to ensure supply and avoid shortages.

Continued on page 2
