 [GitHub/nightzilla](https://github.com/nightzilla)

Dedicated Software Developer and Army Veteran with a passion for learning, team-leadership, and expressing myself creatively. Pursuing Web-Development due to a curiosity and passion for creating products, employing strong critical-thinking skills, and innovating more effective team solutions. I strive for excellence and am motivated to fulfill my company's interests as a long-term asset.

Technical Skills

HTML - CSS - Bootstrap 5 - JavaScript - jQuery - Java - -React- Object-Oriented Programming - Version Control with Git - Paired Programming - Graphic Design - UI/UX Test-Driven Development - Exposure to Comptia

Development Projects

[Weather Bros](#)

Weather Bros connects users to predict the forecast for their next big trip, or even a small getaway. Weather Bros uses map box geocoding api which allow users to search for an address and places by name or coordinates.

Languages that were utilized: Javascript - Bootstrap - JQuery - CSS

[Bros Movie](#)

Bros Movie is a solo project that was developed in React that lets users search up their favorite movies using the TMDB API. In addition, when searching for a new movie, the website uses an API to import a movie poster from the TMDB database.

Languages that were utilized: Javascript, Tailwind, CSS and React

[Travel Bros](#)

Travel Bros is a capstone project, which helps users plan and budget for their trips. My focus was on creating a user-friendly and visually appealing interface to enhance the user experience.

Languages that were utilized: Javascript, Java, SpringBoot, CSS, Bootstrap

[GitHub Finder](#)

Github Finder is a single-page application built in React that allows users to search for Github profiles and repositories using the Github API.

Languages that were utilized: Javascript, Tailwind, CSS, and React
