I have always been intrigued by how things work: the mind, the world, a game and with how vast web development has become. My resilient and studious mindset has bolstered an adaptable behavior gaining knowledge and experience to navigate from the Air Force and submerge myself into web development. The impact one may have in web development can reach an infinite amount of people to make a real difference in their lives and that is where I strive to be.

Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

[Weather-Map Application](#)

Web application to check the weather via search or by interactive map utilizing JQuery, Bootstrap 4, JavaScript, CSS. Weather map project utilizes the use of multiple API's so the user can visually find what city they may not know the name of. Overall the combination of JQuery, Bootstrap 4, JavaScript, and CSS assisted in creating an aesthetically pleasing interface to the overall site.

[SquadUp Application](#)

Web application that matches users on gaming preferences to find new friends to games with. Once a user has found a new friend (aka recruit) and they both mutually select each other they then become comrades. Once comrades they can chat, look at each other's discord username, and even create a squad to game with from each other's chosen comrades so the user can SquadUp and play. The application utilizes calling API's, JQuery, JavaScript, Spring, Thymeleaf it allows a user to sign up, create a profile, find games to find similar users to chat with.
