Career Overview

Highly dependable Web Developer and enthusiastic team player dedicated to streamlining processes and efficiently resolving project issues. Focused and detail-oriented with strong technical skills and the ability to learn concepts quickly.

Skills

- Full LAMP stack
- Apache
- PHP
- MySQL
- Javascript / jQuery
- HTML / CSS
- Laravel (MVC Framework)
- Git (VCS)
- Vagrant

Experience

January 2014 to Current **Freelance (Full Stack) Web Developer**
San Antonio, TX

- **M.B. Athletes:** I was a part of a team that created an online web application system for prospective military dependent student-athletes, who are stationed overseas, to build an athletic profile with video integration and athletic information for college coaches and scouts to review. The website was built using PHP, the Laravel framework, Javascript, jQuery and a MySQL database, Git, Apache and Vagrant. Featured a web management interface and a mobile interface.

*Website will be available April 22, 2014.

- **Personal Web page / Portfolio:** Personal Web Page that displays my contact information and personal summary and features my personal portfolio to showcase all my previous projects. I used PHP, jQuery, Javascript, and Laravel (MVC framework) to build this page along with Twitter Bootstrap framework for the front-end.

- **Whack-A-Cat:** First-person video game based on the classic whack-a-mole game. The application keeps track of score, accuracy in percentage, total number of misses, has three different level options (Easy, Medium, and Hard), and a prize for the winner with 100% accuracy. I mainly used Javascript and jQuery for this application.
- **To-Do List:** Task management system to store and update daily user tasks for everyday errands. This application was built using PHP, JavaScript, jQuery, and MySQL to store the user's tasks. HTML & CSS were implemented along with front-end Bootstrap Framework.
- **Personal Address Book:** Address book application that stores contacts along with their information and creates a downloadable CSV file for spreadsheets. This application was built using PHP, JavaScript, and jQuery; integrated the MySQL database and Git. The design of the application was customized using native HTML/CSS and Bootstrap Framework.

All projects are open source and were documented using **Git** version control system.

All project source code can be viewed here:
