Exposure To: React | PHP | Django | Maven | Hibernate | JPA | Linux

CURRENT PROJECTS

Simple Budget - November 2018

A Full-stack web application that uses APIs, MySQL, Spring Boot, HTML/CSS/JS/JAVA, Bootstrap and is deployed online. Users can create an account, post to the community to share budgeting tips, view, search posts and utilize the built-in budget calculator to attain more financial security.

Adlister - October 2018

A full stack application, which used a Tomcat server that connected to a MySQL database. It allowed users to create a profile, add, edit, search and delete social advertisements

Movie Application - September 2018

A single page web application that allows users to view rated movies and submit there own ratings for movies. It allowed a more user controlled feeling as to other websites which just allowed critic ratings.

Weather Map - August 2018

Using the Open Weather API, built an application that provides users with a three-day weather forecast based on a selected area

EDUCATION

Codeup 2018

Fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.

PROFESSIONAL EXPERIENCE

Kalamazoo Country Day School

Middle School Computer Science Teacher 2017

Created and implemented multi-tiered lesson plans for students 3rd thru 8th grade. This success resulted in a better understanding of multiple programming languages and logic for all ages.

Home Depot - Cashier 2016

Provided exceptional customer service aiming to ensure repeat business opportunities. Effectively made sales referrals and handled exchanges according to company policies.

Stewart Sutherland - Inspector/Packer 2015

Ensured quality control of products which adhered with client standards and employer regulations. Packaged and prepared shipments for nationwide delivery.
