

# LEXI MORGAN

## Software Developer

*I am a unique mix of creativity and logic. I enjoy tackling challenging problems on the backend as well as providing the user with a seamless experience on the front end. I seek out knowledge wherever I can find it, and I look forward to a lifetime of learning in the ever changing world of technology.*

## EDUCATION

### Codeup

Certificate in full-stack web development

April 2019

Codeup is a fully-immersive, project-based, intensive 18 week program focused on full stack development. Codeup provides students with 600+ hours of expert instruction in software development.

### The University of Texas at Austin

Bachelor of Science in Communications

December 2015

I graduated with a focus in Radio, Television, Film. I took rigorous courses in video editing, graphic design, production, web design, animation, business math and english.

## PROFESSIONAL EXPERIENCE

### ShadowGlen Elementary

Teacher July 2017 - June 2018

I collaborated with my team of 4 to provide a top notch education environment for my 23 students. I communicated effectively with parents and colleagues.

### Megalomedia

Assistant Editor September 2016 - July 2017

I worked in Avid Media Composer to prepare, mark, categorize, transcribe, and script sync the footage for season 5 of My 600lb Life.

### Alliance Graphics and Printing

Graphic Designer March 2016 - August 2016

As a graphic designer I communicated with clients to create designs that met their needs. I created print ready designs from scratch as well as edited existing projects. I worked with the Adobe creative suite.

## PROJECTS

### Weekndr

March 2019 - Present

I am working on a team of three to create a group trip planning web application. Users can create a trip, set an itinerary, view events and weather for their destination on the chosen dates, and invite friends. Invited friends have the ability to comment and vote on the itinerary and make suggestions.

### Blog

March 2019

I created a full-stack blogging platform where users can register, upload a profile picture, and create blog posts that include pictures and categories. Users have the ability to edit and delete their posts. The categories are displayed with icons on each post.

### Adlister

February 2019

I worked on a team of three to create a full-stack application using Tomcat where users can browse and post ads. Users can register for the site and create a personalized profile, post ads, search and view ads that others have posted, and edit their ads as needed. Users also have the ability to delete their account.

### Movie Application

December 2018

I pair programmed on a team to create an application where users can add, delete, edit, and rate movies. This application used json-server for the backend. The movies were edited, deleted, and rated using AJAX requests.

## SKILLS

HTML - CSS - Bootstrap - Javascript - JQuery  
Java - MySQL - Spring Boot - IntelliJ - Github  
Workflow - Implementing API's - Pair Programming

Graphic Design: Illustrator - InDesign - Photoshop  
AfterEffects

Intermediate Spanish speaker
