PROJECTS

E-Libraries March 2019

An online book store where users can buy, sell, and trade used books. Uses Open Library and Google Books API to check and verify published books. Incorporates Stripe API to handle user-to-user transactions.

VIA Quick Trip Feb 2019

A web version of VIA's Quick Trip mobile app for iOS. Built on NodeJS and Vuetify with TypeScript for back and front-end logic. The web app focused on improving lesser features of the existing mobile app.

Adlister Feb 2019

A full stack application where registered users can create, edit, delete and search for advertisements on a public platform.

Movies Application Jan 2019

A single page web application that allowed users to view rated movies and submit their own ratings for movies.

TECHNICAL SKILLS

HTML, CSS, JavaScript, Java, MySQL, Git/Version Control
Exposure: JQuery, Bootstrap 4.2, NodeJS, TypeScript

Knowledge driven software dev who takes on new challenges head on. Not afraid to learn and utilize different technology and understands every tool can be useful, given appropriate circumstances. Observes in collaborative environments to find weaknesses in order to improve and drive efficiency.

EXPERIENCE

SELECTIVE SOLDER MACHINE OPERATOR

Season Group 2016-2018

Processed PCBs following assembly's instructions. Checked for imperfections after machine soldering and corrected with soldering iron. Collaborated with engineering team for new program design and existing program improvements.

EDUCATION

Codeup 2018-2019

Fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.

ITT TECHNICAL INSTITUTE

Associate of Applied Science in Electrical Engineering June 2016
