

JACQUELINE MURALLES

Software Developer

Driven Air Force Veteran with a servant leadership mindset focused on using teamwork to find and communicate a common mission. The ability to adapt to quickly changing environments and strong perseverance helped me guide team members through multiple transitioning periods. I am able to remain enthusiastic and steadfast during high-stress work environments and seek out opportunities to grow my professional skill set.

Professional Experience

Chili's **03/2010**
Waitress

My ability to multi-task was critical when my responsibility was split between the front and back of the house. Serving is where I learned to maintain calm under immense pressure and time management skills.

Military Background

United States Air Force **2011-2019**
Secret Clearance **Active**
Public Health Technician **2011-2017**

Was responsible for deploying hundreds of personnel with the proper vaccines, medication, medical equipment and medical qualifications. Effectively communicated when delivered briefings on the importance of medications, medical processes, and sanitation procedures while deployed to austere locations. Fastidious team member, data-driven and committed to making decisions based on the most accurate and up to date information available.

Air Transportation Specialist **2017-2019**

Air Transportation required on-the-spot analytical thinking when loading pallets and special cargo onto military aircraft. Clear and concise communication was needed along with customer service driven care to help passengers get to or from a destination as smoothly as possible. While missions required fast work the quality of each task was never compromised.

Development Projects

GardenSeedr

A full stack web application that uses OpenFarm API and OpenWeather API to provide vital information to new gardeners such as spacing and sunlight requirements for plants and weather information. Languages include Java, JavaScript, HTML, Bootstrap and more all ran on Spring Boot.

Homebodies

In the age of COVID-19 Homebodies allows users to create reviews on sanitation procedures of local restaurants and stores. Programmed with Java Servlets, JSP expression language, and MySQL with Model View Controller patterns.

Weather Map

Utilizes Mapbox API and DarkSky API to relay a three day weather forecast to the user. Location can be chosen through text input or the user can drag the marker to where they would like weather information.

Movies Application

This application utilizes JavaScript functionality to pull information from a locally hosted JSON server using Ajax requests. The application allows for users to edit, add and delete movies which then get updated in the JSON file.

Education Background

Codeup **2020**
Certificate of Completion

A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.

Northwest Vista **05/2019**
Associates of Arts

Texas State University **12/2019**
79 credit hours towards a BA in Digital Media Innovation
