TECHNICAL SKILLS

HTML	MySql
CSS	NodeJS
JavaScript	NPM
Java SE	Thymeleaf
BootStrap	JQuery
VCS with GIT	Java EE (Servlets,JSP)
Paired Programming	Test-Driven Development
SpringBoot Framework	Object-Oriented Programming

Exposure to : Visual Basic, Linux/Unix, information Security.

PROFESSIONAL EXPERIENCE

MACKHAIK FORD-LINCOLN **2019**
Salesman
I was responsible for recruiting my clientele, and meeting a monthly quota. These responsibilities made me able to keep track of my progress and negotiate timing for appointments.

MILITARY EXPERIENCE

U.S. ARMY **2016-2019**
Secret clearance Investigation date: April 2016

11B Infantry Man
Responsible for defending our country against any threat by land, and capturing, destroying, and repelling enemy ground forces. Trained individuals in their weapons tasks and drills as well as in small unit tactics.

Team Leader
Taught and mentored a group of five individuals. Ensured that they knew how to operate both foreign and domestic weapons safely and efficiently. As well as leading multiple operations while managing a Fireteam.

DEVELOPMENT PROJECTS

Adventure Buddies **August 2020**
This full-stack application facilitates the hiking, mountain biking experience for the user. The application will allow a user to view hiking trails and all the information of the trail including length and elevation, as well as weather. With this app the user will be able to create a hiking or mountain biking event to meet with other users that want to do the same activity on the same trail during the same time. The app also keeps track of user emergency contact information for any emergency that should arise during their adventures.

AdLister Project **August 2020**
AdLister's functionality allows users to create, post, and configure ads for items they are selling. The user can view all of their posted ads on their profile page, where they will have the ability to edit or delete the ads they created. This application was created using core Java SE MVC for the backend, and CSS Bootstrap for the frontend.

Weather App **May 2020**
Retrieves real-time weather data based on selected locations and surrounding area. A user can dynamically move map markers or search to populate forecasts. Additional features include changing temperature, forecast types, and map styles. Programmed using asynchronous JS, dynamic HTML, JQuery, and Map-box API.

Coffee Project **April 2020**
Worked together with a Team Member to develop a seamless UI that displays and searches for, Your favorite coffees, New coffees, Popular coffees. As well as allows the user to edit the menu and add their most wanted roast. This project used JavaScript, JQuery, dynamic HTML, as well as Bootstrap and custom CSS.

ACADEMIC BACKGROUND

CodeUp **Certificate of Completion** **September 2020**
A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.
