As a software developer, I thrive most in the ever-changing technology enhancements by constantly performing research and learning something new. I am versatile and a quick learner willing to embrace new challenges and eager to learn more and grow as a software engineer. I will strive to be a supportive and enthusiastic team player dedicated to streamlining processes and efficiently resolving project issues.

DEVELOPMENT PROJECTS

WILLING

Willing is an application that allows users to create a profile and album to distribute possessions of yours, or a departed loved one, among family, and friends. Functionality included are Java, Spring Boot, CSS, Bootstrap, and JavaScript.

AD LISTER

Created an app that requires users to register to view, and create a post of their choosing, but can only edit, and delete posts they've created. Functionality included are Java, Spring Boot, Bootstrap and Thymeleaf.

MOVIE APP

Developed an application that lets users view, input, edit, and delete movie data. My contribution included JavaScript functionality and CSS styling.

COFFEE APP

Created an application that lets users view or add coffees and the ability to sort by coffee name or roast type. My contribution included JavaScript, HTML, and CSS.

MOVIE SEAT BOOKER

An App that Lets you choose a movie, calculates the total of movie(s) and lets you select the number of seats you desire. Functionality included are HTML, CSS, Javascript.

BREAKOUT GAME

Break-out is a simple recreation of the 1976 Atari game of the same name. you just move a paddle at the end of the screen and try to break as many bricks as possible to gain a high score.
