

# CHARLES BRANT-STEC

SOFTWARE DEVELOPER

☎ 215-869-4925 ✉ charlesbrantstec@gmail.com 🗣 charlesbrantstec  linkedin

## ABOUT ME

I am a software developer eager to jump into the complexities of programming and implement my attributes of craftiness, methodical analysis, and single-track focus garnered from a life of immersion in musical instruments.

## TECHNICAL SKILLS

HTML	Test-Driven Development
CSS	Java SE
JavaScript	MySQL
Bootstrap	Spring Boot Framework
VCS with Git	jQuery
Paired Programming	Object-Oriented Programming
Thymeleaf	Java EE (Servlets, JSP)

## PROFESSIONAL EXPERIENCE

### BUSINESS SOLUTIONS

**ASSESSORIA, INC 6/14-5/20**

My ability to communicate with people in a professional manner came into use when helping direct clients, largely of the Brazilian community, to the extension that would answer their inquiries relating to, taxation, and other paperwork-related needs. My work eventually entailed entering client expense and income data for construction companies into accounting software in preparation for taxation purposes, in which quick and accurate typing skills accrued through a childhood of PC gaming helped greatly.

## DEVELOPMENT PROJECTS

### MOVIE PROJECT

8/20

A challenging project in which we made use of JavaScript, JSON databases, APIs to get movie image data, and Bootstrap. The use of a sleek styling works in conjunction with intuitive functionality in what I feel set my team's project apart.

### COFFEE SHOP PROJECT

7/20

A project where we designed an interactive coffee-shop website in which the user can customize their coffee blends. I worked with the styling of the interface using Bootstrap and created a streamlined interactive output using Javascript.

### WEBSITE DESIGN PROJECT

6/20

A design-oriented project that referenced a fictional wireframe of a web development company. Using HTML, and CSS, we were able to create a well-designed website, and the use of Bootstrap was instrumental in the final output.

## ACADEMIC BACKGROUND

### CODEUP

11/20

#### CERTIFICATE OF COMPLETION

A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.
