Software Developer

Multitalented Software Developer with experience in web development. Demonstrated excellent skills in HTML, CSS, JavaScript, and Java. True team player with strengths in adaptability and accuracy.

Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

Capstone Project

Operation Co-Opt is a Full-Stack web application designed for games that want to connect and socialize with other gamers. The application was built using HTML/CSS, JavaScript, jQuery, Bootstrap, Java, Spring Boot, MySQL, and IGDB API.

Adlister Project

A Full-Stack Java application that implements the Model-View-Controller (MVC) software design pattern and utilizes Java Database Connectivity (JDBC) for performing Create, Read Update, and Delete (CRUD) operations with MySQL as the relational database management system (RDBMS).

Movie Project

A project focused on Paired Programming that involved NPM, JavaScript, HTML, Bootstrap, jQuery, CSS to generate a webpage that allows users to add, edit and remove movies from their movie playlist.

WeatherMap Project

A self-project utilizing API Ajax request along with jQuery, JavaScript, HTML, and CSS. The project was to create and utilize a website that allows users to receive a five-day forecast. This site will provide options to the user to navigate via the search input or by clicking anywhere in the world using MapBox API and OpenWeather API in real-time weather data.
