

# Brian Barton

## SOFTWARE DEVELOPER

I am a dedicated full-stack developer with excellent communication skills. I enjoy detail-oriented work and tackle my projects with confidence and finesse. I have a passion for solving problems and learning. This makes me an ideal candidate for the job. My goal is to join a team where I can nurture my skills as a developer by creating interactive and user-friendly software.

Bootstrap

JQuery

My SQL

Spring

Paired Programming

Test Driven Development

Object-Oriented Programming

Version Control With Git

### Exposure to

Python, Nodejs, Ruby, Webpack, Customer Service

### Education

#### Codeup Certificate of Completion 2020

A fully-immersive, project-based, and intensive 22 week full-stack java career accelerator that provides students with 670+ hours of expert instruction in software development

### Professional Experience

#### Ruth's Chris Steakhouse (2013- 2020)

##### Server

Worked in two different locations and trained in the extensive wine list and pairing recommendations with specials and regular menu items. Continually sought to exceed the guest's expectations.

#### Sushi Den (2017 - 2019)

##### Server

Pivotal role as team player monitoring and expediting food times from up to 7 kitchen windows and 7 sushi bars while requiring flawless precision and timing for creating the best guest experience.

### Developer Projects

#### Weather Map

A Javascript/JQuery driven application that provides a 5 day forecast anywhere in the world. I incorporated Mapbox API to provide realtime information to users anywhere.

#### Tryit Diet

TryIt Diet is a platform to promote health by making it easier to learn more about different diets to not only battle obesity, but also COVID-19.

#### The Adlister

Fueled by Java, this backend application uses servlets, JSP, JSTL, Database connectivity, MVC, Sessions and cookies, password protection and more to build this craigslist clone.
