David Bess

### SKILLS

HTML	MySQL
CSS	Spring boot framework
JavaScript	jQuery
BootStrap	Object Oriented Programming
VCS with Git	Test driven development
Paired Programming	Java EE (Servlets/JSP)
Java SE	

Exposure to: AnyPointStudio/MuleSoft4, RESTful API testing/development, Active Directory/Powershell C#, Python, SSO

### PROFESSIONAL EXPERIENCE

#### Capital Group 2018-2019

Ran portfolio hypotheticals with staff for stock performance and salesforce member management using salesvue. Organized meetings and salesforce members packets that contained data with talking points.

#### PPG 2017-2018

Managed a diverse client portfolio with 250 active accounts. Responsible for development of new business by means of relationship building and networking with clients. Clearly articulate PPG's value proposition and engaged the customer in jointly addressing business priorities.

### ACADEMIC BACKGROUND

#### Codeup 2020

##### *Certificate of Completion*

A fully-immersive, project-based, an intensive 20 week full stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.

### DEVELOPMENT PROJECTS

#### AD Lister 9/2020

A full stack Java application built using the MVC design pattern. Users can register for an account and add/edit/delete ads once signed in. Users may also view/search through ads created by other users. Admins can add/edit/delete ads created by any user and may create new categories for ads. This application utilizes servlets, JSPs, JSTL, password hashing, and MySQL for the database.

#### Conacts Manager 8/2020

A CLI contacts manager written in Java that allows a user to enter, edit, delete, and search contacts. The application writes all changes to a text file.

#### Movie Application 7/2020

A web application that allows a user to create a collection of movies with user-selected ratings. The user has the capability of adding new movies or editing/deleting existing movies using a CRUD method. A movie poster API is also utilized to populate posters for any movie that is added into the application

#### Weather Map 6/2020

A web application that integrates the Mapbox API and Darksky API to capture a user's selected location and display a three day weather forecast for that location. This is done using AJAX requests when a user inputs a location in the search box or drags the marker on the map to any desired location.
