SUMMARY

I am an adaptable and inquisitive problem solver that utilizes in-depth research to find the best possible solution. As a developer, programming provides opportunities that expand my desire to learn and impart new strategies to fellow colleagues. I seek to operate in a collaborative environment that values the development of team members, and encourages professional growth.

TECHNICAL SKILLS

- HTML
- CSS
- JavaScript
- Bootstrap
- JQuery
- Java SE
- Object-Oriented Programming
- MySQL
- Test-Driven Development
- VCS with Git
- Java EE(Servlets, JSP)
- Spring Boot Framework
- Paired Programming
- Thymeleaf
- Exposure to (ReactJS)

DEVELOPMENT PROJECTS

Better Reads

Better Reads is a Full stack application that is deployed via DigitalOcean. I utilized Spring Boot Framework to allow users to create a profile, add books to their bookshelf, leave book reviews, and join book clubs. User information is stored as Java Objects to MySQL Database, modification and application traversal is handled via Spring Boot controllers. Spring Security and Thymeleaf are implemented to ensure user security throughout the site. Book information is fetched from GoogleBooks API and passed to the view using JQuery and vanilla JS.

Adlister

Full stack application that will display an assortment of ads created by users that are stored in a local MySQL database. A user is able to traverse throughout the application through the implementation of Java servlets and JSP's. A security functionality is implemented via Java sessions that will restrain a visitor or logged in user from performing tasks depending on if they have the proper credentials. A user has the ability to search for ads by a passing a search value to a custom Java repository method to retrieve and display all ads that match the passed value.

Movie Database

The movie app displays an assortment of movies generated from an API. It features a search input that will dynamically change what movies are shown depending on the characters present, and allows the user to add movies to their watchlist utilizing JQuery.

PROFESSIONAL EXPERIENCE

H-E-B Grocery — San Antonio, TX

Aug. 2016 — Jan. 2021

Food Sales Specialist

- Trained and developed partners on company processes in selling techniques, and to ensure proper food safety procedures
- Managed online presence by evaluating invoices and entering data to reflect current inventory
- Maintained and organized presentable merchandise to drive continuous sales
- Implemented up-selling strategies for complementary purchases

EDUCATION

Codeup

2021

Certificate of Completion

- A fully-immersive, project-based, and intensive 22-week full-stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.
