Development Projects

Capstone Project

- Worked as a team of four to build an application called "EchoVault" that allows users to create digital memorial pages(Echoes) for loved ones. Users can register, login, view and create Echoes, and post about treasured memories. Used Spring Boot, Java, HTML, JS. and Materialize.

Adlister Project

- Collaborated with two team members to build a Craigslist clone called "Hexlister." Allows fictional witches and familiars to buy and sell their wares. Users can register, login, view and create ads, and edit/delete their own ads. Used Java, HTML, and Tailwind.

Movie Project

- Using JS, HTML, Bootstrap, and CSS, my partner and I made a fictional movie application. It allows the user to view, edit, add, and delete movies from a webpage.

WeatherMap Project

- Allows a user to get a 5-day weather forecast for any clickable location on a map using OpenWeather API and Mapbox API. I used API, AJAX, jQuery, JS, HTML, Bootstrap, and CSS.

Coffee Project

- This paired programming project created a webpage for a fictional coffee company. It allows the user to view all available coffee types, search for a coffee type, and add a coffee type to the list. Involved JS, HTML, Bootstrap, and CSS.
