## Education

### Codeup

Certificate of Completion  
Sep 2020 - Apr 2021

A fully-immersive, project-based,  
and intensive 22-week Full-Stack  
Java Career Accelerator that  
provides students with 670 hours  
of expert instruction in software  
development

### Brigham Young University-Idaho

Bachelor of Business Management  
Jan 2008 - Dec 2017

Completed an undergraduate  
degree in business management

Software Developer with an ownership mentality operating independently and in a team environment. Knowledge of computer science fundamentals: data structures and algorithms, with an understanding of system development life cycles. Delivering clean and intuitive web designs by utilizing a wide range of software, tools and programming languages including Javascript, REACT, HTML, CSS, jQuery, REST API's, Java, and MySQL. Hardworking, results-oriented, with experience in managing time effectively.

## Development Projects

### [Echo Vault](#)

Full stack web application that gives people an easy and convenient location to share memories of deceased loved ones with stories, photos, and more. Built with Java, MySQL, Spring Boot, Thymeleaf, Materialize, and deployed to the web.

### [Weather Application](#)

Used Mapbox API and OpenWeatherApp API with JavaScript to display a 5-day weather forecast

### **Movie Application**

JQuery project allows the user to search through a database of movies from an API, review and rate the movie, and sort and filter through movies. The layout was created with CSS and Bootstrap and the movie posters came from an API.

### [Coffee Project](#)

JavaScript web application that allows users to navigate through the stock of a mock coffee shop. Users are able to add, edit, and delete types of coffee. Combines HTML, CSS, and Bootstrap

## Professional Experience

### **Hill Country Healthy Vending** - San Antonio, TX

*Owner Operator* / Jul 2018 - Present

- Train and manage four employees, creating procedures for them to independently conduct daily operations.
- Leverage QuickBooks while managing bookkeeping and accounting with nearly \$200,000 in revenue the first year of business
- Manage inventory by creating a system that analyzes, purchases, and tracks using advanced Excel, reducing cost of goods by 10%
- Oversee relationships with more than a dozen clients
