Witnessing the passion and creativity behind software development inspired my decision to focus on my web development and design skills. My desire to seek out a career in a challenging field derives from my past experiences in technology, administration, and hospitality. I look forward to creating and implementing innovative solutions that meet the needs of my future company and clientele.

Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Version Control with Git - Paired Programming

Development Projects

WorkUp

WorkUp is a full stack web application that connects recent career-accelerating "boot camp" grads with experienced developers, and project owners, who are looking to bring a fresh set of eyes into their pending projects. Both users can create profiles, upload images through the Filestack API integration, and communicate through email with a MailTrap API. Developers can browse and select a project, while a project owner can request a skill-preferred developer to work on their project. WorkUp was built using the following technologies: HTML, CSS, Bootstrap, JavaScript, jQuery, Spring Boot, ThymeLeaf, Java, and MySQL.

Contacts Manager Command Line Application

Created a Java command line program that allowed the users to interact with a phone contacts program. Built by paired programming, the program interacts with the user by prompting for next steps, and has a main menu that allows the user to add, search, delete, and view all of the contacts.

Coffee Project

Created a JavaScript application with a partner to allow users to search, add, and delete coffee roasts, then styled with Bootstrap. The application resembled a coffee shop's website to view and select different coffee roasts.

Codeup Design Project

Created a responsive site for a fictional company using HTML, CSS and Bootstrap with paired programming. The site was designed to layout content for various screen sizes.

Professional Experience

Scaleworks, Inc. - San Antonio, TX
