Certificate of Completion

Jan 2021 - Jul 2021

A fully-immersive, project-based, and intensive 22-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development

University of Texas San Antonio

Jan 2017 - Dec 2019

Completed two years of undergraduate computer science studies with a minor in English

Software Developer with individual and group experience in full-stack development. 6+ years experience in the food-service industry has developed the ability to work in challenging fast paced environments, but my appreciation for technology inspired the transition into full-time web and software development. Excited for the opportunity to leverage my technical and customer service skills to work on projects that increase the end-user's experience.

Development Projects

Capstone - WorkUp

Application utilizing Java, MySQL, Spring, and Thymeleaf that helps young developers after graduation gain experience and credibility by completing miscellaneous projects for senior developers while they pursue a job

Full-Stack Adlister

Ad Lister that uses Java, MySQL, Javascript, JQuery, HTML, and CSS to make a website where users may register to buy and sell specific products.

Movie Project

Web application using an NPM to pull from a library of movies and gave the user the ability to create, replace, update, or delete a movie

Weather Map Project

Utilized a MapBox API to display a dynamic weather map with markers and weather cards that correspond with the user's voice of place

Coffee Project

Web application that emulates a coffee shop where the user may select from different types of coffee drinks and may even add their own
