Software Developer and experienced warehouse manager with experience leading a team, conducting operational and inventory logistics, and improving customer relations. Looking to leverage my passion for problem solving heightened by my technical knowledge into a role as a full-stack developer to manage the complete lifecycle of software and applications.

Technical Skills

HTML, CSS, Bootstrap,

JavaScript, jQuery,

Java SE, Java EE (Servlets, JSP),
Spring, Thymeleaf, MySQL,

Object-Oriented Programming,
Test-Driven Development, Version
Control with Git, Paired
Programming

Exposure to: Python, C#, C++

Education

Codeup

Certificate of Completion
Mar 2020 - Sep 2020

A fully-immersive, project-based,
and intensive 22-week Full-Stack
Java Career Accelerator that
provides students with 670 hours of
expert instruction in software
development.

Northwest Vista College

Associate of Business
June 2012 - June 2014

Completed two years of
undergraduate business studies with
a focus on accounting.

Development Projects

[Top-Teer](#)

Top-Teer is an event coordinating application that puts volunteers in touch with opportunities led by the event coordinator. Making the process of volunteering in the community more accessible to application users. Top-Teer was created using Spring Boot, Spring Boot Security, Java, Javascript, MySql, HTML, Css, Bootstrap and Sendgrid API.

[Java Adlister](#)

Group project built with HTML, Bootstrap, MySQL, JavaEE (Servlets, JSP), and Tomcat. This full-stack application is a Craigslist clone that allows a user to view all currently-posted ads. Users can also register on the app, allowing them to add, edit, and delete their own ads.

[Movie Database](#)

Used JavaScript and ajax requests to allow users to search, add, and delete movie information by name and category while pair programming.

[Weather Map](#)

Allows a user to designate a location via the drag and drop of a pin or entering a location manually. Through the integration of the OpenWeatherMap API, displays a five-day forecast on the user end. HTML, CSS, Bootstrap, jQuery, AJAX, OpenWeatherMap API, and Mapbox API were all utilized.

Professional Experience

Water City - San Antonio, TX

Warehouse Manager / June 2012 - Oct 2020

- Trained 10+ employees to maximize efficiency and adherence to the company's logistical and procedural protocols.
- Developed new filing and organizational practices, saving the company \$10,000- \$12,000 per year in contracted labor expenses.
- Maintained a healthy business relationship with 100+ loyal customers.

Osaka Steak and Sushi - San Antonio, TX

Server / May 2011 - Nov 2018

- Averaged \$1000 dollars worth of sales each shift for multiple years.
- Influenced and adapted to a constantly growing and evolving menu.
- Managed closing duties, including restocking items and reconciliation of the cash drawer.
