Object-Oriented Programming,
Test-Driven Development, Version
Control with Git, Paired Programming

Education

Codeup

Certificate of Completion
May 2021 - Nov 2021

A fully-immersive, project-based, and intensive 22-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.

Volunteer Experience

Steele Architectural Design
Competitive Team

Assistant at the Schertz Animal
Shelter

Software Developer leveraging freelance opportunities to design products and implement business solutions. Using development skills to create high quality work. Eager to keep growing my full stack acumen and expand my concept implementation to contribute to efficient solutions.

Development Projects

Basketball Gurus

Application developed on a team of 5 implementing Spring and an MVC design pattern. It is an NBA Fantasy sports app that allows users to create their own team of NBA players and compete among their friends with a point system tied to real world performance of your chosen players. I focused on backend development, designing the database, creating background functions that update games regularly, and other backend functionalities.

Adlister

Application made with Java servlets and JSP in an MVC pattern. Developed on a team of three. The application allowed users to create an account, login, create ads, view ads, delete ads, search through other users posts, and several other features. Personally created the validation features that checked the validity of the input prior to sending it to the database, protected the created users and posts from SQL injection.

WhyMovies

Application created with pair programming that used Javascript, HTML, CSS, Bootstrap to allow for a website that shows movies that are "on a users list" that displays relevant info about a movie. New Movies and Tv Shows can be added with a search bar that will auto populate all of the information from just the title. Gives users CRUD functionality for movies on their list.

Professional Experience

Chain of Strength Tattoo - Cibolo, TX

Freelance developer / Aug 2021 - Present

- Developing and designing a full stack a website for local business including UI, backend, and database
- Collaborated with client directly to implement admin and user-end feedback as part of the product development process
