Development Projects

Future Stem

HTML, JavaScript, CSS, Spring, Java, Thymeleaf, FileStack API, Trivia API

[Future STEM](#)

Future STEM is an interactive and engaging responsive full stack application targeted for your STEM student. Your STEM student can find engaging project ideas to do at home then choose to display his/her interpretation on his/her profile so others can check them out! Our primary mission was to bring the parent and student closer together, in a way that has the parents being an active participant in the students' education. FutureStem has set a short interest quiz after the signup process that you and the student can take together, to see which STEM pillar the student is interested in.

Live and Local

HTML, JavaScript, Bootstrap, Java,

[Live and Local](#)

Live and Local is a web application for finding your favorite next up and coming local artist. This is a great platform to promote your music and any concerts you plan on putting on in your local area, the sign up process is straight to the point as an artist you can post your next concert with a date, time and location and if there is an entry fee, for the concert goes to see and RSVP attend

Movie Project

HTML, JavaScript, jQuery, Bootstrap, Omdb API, RESTful API

[Movie Project](#)

Looking for information about a particular movie? Look no further dope movies can help add a new movie by searching the name, edit the movie information if there are inaccuracies, delete a movie if it bores you dope movies gives you the year of release, director name, title of movie, Imdb rating

Weather Map Project

HTML, JavaScript, jQuery, Bootstrap, Openweather API, Mapbox API

[Weather Map Project](#)

See a current forecast and the following five day forecast for your area by searching your city, state, or dropping a pin on a certain location get the weather for you're area or the weather on the other side of the world it is all up to your curiosity

Coffee Project

JavaScript, HTML, jQuery, Bootstrap

[Coffee Project](#)

Order a cup of coffee or add a new coffee and roast there is functionality to search through a rendered list of coffee names and roast that corresponded with the search term provided by the user

Codeup Design Project
