

John Alejandro

Software Developer

 (210) 865 7678  john.e.alejandro01@gmail.com  [Linkedin/John Alejandro](https://www.linkedin.com/in/JohnAlejandro)  [GitHub/JohnAlejandro](https://github.com/JohnAlejandro)

Results-driven, Full-Stack Web Developer and Air Force Veteran with years of leadership experience and operations management. Analytical and creative problem-solving tendencies drove me to software development to create products that are customer-driven and eye-pleasing.

Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

[TravelBuddy](#)

TravelBuddy is a website where you can read and leave reviews on local coffee shops, breweries and eateries as a local or a visitor. This will assist you in creating an itinerary for your visit to the selected city. We created TravelBuddy as our capstone project using Spring, MySQL, Thymeleaf, HTML, CSS, Java, Javascript, Mapbox API, and Bootstrap. This was a group project.

[Adlister](#)

This website was created to allow local artists a place to list their events and for locals to view local events in the area. We created this site using MySQL, HTML, CSS, Java, and bootstrap. This was a group project.

[Weathermap Project](#)

I created a 5-day weather forecast that displayed temp, weather description, wind, and pressure. The web page also had the ability to drop a pin and display weather for that new location. I utilized an OpenWeatherApp API and Mapbox API. I used HTML, CSS, Javascript, and Bootstrap. This was a solo project.

Military Experience

Air Force - San Antonio, TX

Aerospace Propulsion Specialist / Nov 1988 - Oct 1996

- Accomplished rank advancement at an accelerated pace at every level to Staff Sergeant and attained supervisory level within the first four years
- Managed a team of six technicians and trained 12 airmen in maintenance operations, quality control compliance, and inventory management; resulting in maximum overall performance in all areas of maintenance, including installation, storage, and transportation
- Mastered diagnostic skills to troubleshoot aircraft engines, disassemble, inspect, and replacement of defective components to eliminate costly engine downtime
- Ensured effective and proper disposal of hazardous waste and materials using prescribed standards to protect the environment. Correctively enforced all PPE and Hazmat policies resulting in 100% compliance

Professional Experience

The Home Depot - San Antonio, TX

Operations Manager / Dec 1998 - Feb 2021

- Continuously grew in managerial leadership, gaining six levels of store operations mastery
- Managed a wide range of overall responsibilities, including staffing, strategic planning of business growth, safety, overall associate training and development, and talent planning
- Consistently ensured overall compliance of store operations through execution and grew business operations by maintaining #1 Top Store status or within Top 10 in Operational Sustainability within 102 stores in the Gulf Region
- Implemented customer service and training & staff retention strategies to increase comp-sales and to remain Top Company to Work For and continuous positive Voice Of The Customer reviews.
- Maintained successful and consistent execution of Standard Operating Procedures (SOP's) to keep 99% in-stock levels across all departments with more than 47,000 items SKU's
- Ensured expert and keen oversight to all back end and front end teams by implementing risk-management and process augmentation efforts to reduce inventory loss and theft to increase overall net profitability
