Exposure To: Angular - React - React Hooks - Vue - Node - NPM - Express.js - EJS - MongoDB - Mongoose - Firebase - Bash Command Line

Development Projects

[Share](#)

Share is a social networking and online marketplace that allows members to lend and borrow items with fellow neighbors. Share users can list their items, freely adjust daily borrow fees and time limits, and engage in lending with other users. Users can also leave reviews and message others directly. My roles in this four person team included being the sole designer, lead front end developer, and backend support. This full-stack application was made using HTML, CSS, Bootstrap, JavaScript, MySQL, Java, SpringBoot, Thymeleaf and multiple APIs. This application is also completely mobile-responsive with all original assets.

[Manga Trader \(Adlister\)](#)

Find, sell and browse all types of manga with Manga Trader. Create your own account, log in and see what other manga lovers post and share. This full stack application utilizes a user-centered MySQL database along with servlets and JSPs created using Java.

[Movie Project](#)

Rate and review movies you've seen and track what you want to watch using the application. Rename movies and add your own description to personalize your movie list. Lead programmer in this paired programming project, utilized a prebuilt Rest API for user data along with HTML, CSS, JavaScript and jQuery to provide CRUD implementation.

[Weather Project](#)

Search current and forecasted weather conveniently by dragging and dropping a pin on a map, eliminating the need for zip codes/city searches. View daytime high and lows, humidity and wind conditions and sunrise/sunset times. Multiple communicating API's. Solo project using HTML, CSS, Javascript, Bootstrap.

[Coffee Project](#)

Save your custom coffee to make ordering faster, quickly view and search menu items. Paired programming project utilizing HTML, CSS, JavaScript and Bootstrap.

Professional Experience

Texas Think- Spring Branch, TX

Web Manager & Designer / Apr 2020 - Present

- Front end Webmaster for websites for Texas Workforce Solutions (TWFS) Middle Rio Grande Valley & Golden Crescent, Middle Rio Grande Development Council
- Execute a cloud-based landing solution program to produce a website congruent with TWFS sister sites which allowed over 1,000 job seekers and businesses to connect, and find various specialized services
- Improved UI/UX across all websites TFWS
- Leverage design meetings to incorporate client feedback to build an information based non-profit website
- Created content and graphics to update sites weekly; task included, forms using Formstack, banners, flyers, forms, and contact information

RhiDesigns - Spring Branch, TX

Founder & CEO / Mar 2017 - Present

- Constructed a static landing page for a startup drone operation using HTML, CSS, and Bootstrap with complete responsiveness and custom logo design
- Created infographics for non profit organization Project Graduation, band marketing ads for RXS and real estate logos for Keller Williams Agent
- Built a website to showcase my UI/UX work to clients while simultaneously acting as an art portfolio starting from a wireframe with HTML, CSS, Bootstrap, JavaScript and jQuery, all original visual elements digitally drawn and designed, and implementing mobile responsiveness

Education

Codeup

Certification of Completion

Aug 2021 - Feb 2022

A fully-immersive, project-based, and intensive 22-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.
