## Technical Skills

HTML, CSS, Bootstrap, JavaScript  
Java SE, Java EE (Servlets, JSP),  
Spring, Thymeleaf, MySQL,  
Object-Oriented Programming,  
Test-Driven Development, Version  
Control with Git, Paired  
Programming

## Education

### Codeup

Certificate of Completion

Jun 2022 - Oct 2022

A fully-immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.

Diligent full-stack software developer who writes innovative and clean solutions that lead to productive and helpful software applications. Through code I am able to build webpages that flow seamlessly through front-end functionality.

## Development Projects

### Media Query Project

This was a paired programming project. We built and styled a media query page using CSS and HTML. Our page was responsive and it had both mobile and desktop versions. We used IntelliJ to build this project.

### Design Project

This was a paired programming project. We built a responsive website for a fictional design company using the Bootstrap Grid System. We made an `xs`, `sm`, `md`, `lg` and `xl` page. We styled the page with a Bootstrap and CSS.

### Coffee Project

This was a paired programming project. We built a website for a fictional coffee company using Javascript and HTML. We made a search bar that updates the coffee selection with a keyup event. We added an option for the user to add coffees to the inventory. We styled the page with Bootstrap and CSS.

### Weathermap Project

This was a solo project. I built a weather map using HTML, CSS, AJAX, and an OpenWeatherMap API. It has a functional search bar that updates with a keyup event. It has a draggable marker that also updates while submitting the search bar. It displays a 5 day forecast of the location that is searched or where the pin is dropped. I used IntelliJ to build this project.

### Movie Project

This was a paired programming project. We built a fictional movie website that is a Single Page Application (SPA). We provided the movies by fetching from a database with an API. Using Javascript, we allowed users to edit, delete, and add movies. We also allowed them to leave a rating on the movies after watching. We styled the page with CSS and Bootstrap.

## Professional Experience

### **BTX Nutrition** - Bandera, TX

*Barista* / Jun 2021 - May 2022

- Trained two new employees in store operations, health and safety compliance, and product knowledge
- Managed inventory by maintaining vendor relationships with local businesses to obtain 100% fresh ingredients
- Handled \$1,200 - \$1,500 in daily sales and maintained cash-flows by making weekly bank deposits.
- Provided consistent customer service up to 300 customers per day by handling requests for information in a timely manner.
- Followed and enforced store cleanliness guidelines before, during, and after handling customer consumable.
