Object-Oriented Programming,

Test-Driven Development, Version

Control with Git, Paired Programming

Education

Codeup

Certification of Completion

May 25, 2022 - Oct 2022

A fully-immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.

Software Developer and Army Veteran with experience in operations management and shipping logistics. Creating functionality within code to output comprehensive interfaces for all users.

Development Projects

I-Plant

A group project to design a website, with working frontend and backend, using 3rd party API for functionality. I-Plant was designed to give visitors access to information via post by users. Visitors can also access and use the services provided to select and order items from our products page. Registered users can, create, post, select and order products, also, use the PlantId option using an API to identify a plant by providing a picture.

Movies Project

Paired project Movies app that utilizes API calls, databases, and local Repositories while using Spring to launch and support a website experience similar to Netflix.

Coffee Project

Paired project web page design to show list of Coffees to users. Users can then add or remove a coffee using interfaces on the page. Creating front-end web page interactivity using JavaScript, CSS, bootstrap and HTML for the functionality and formatting of the page.
