Codeup

Certificate of Completion
May 2022 - October 2022

A fully-immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development

San Antonio College

Associate of Arts
Jan 2014 - Jan 2020

Crafted a wide variety of skills related to various mediums of art, in addition to cultivating diligence, and openness to new perspectives of creating work which has improved the quality of all subsequent projects

Full stack web developer and former logistics manager with a specialty in troubleshooting and design. Experience with project development, in collaboration and solo environments, from wire-frame concept to application launch. Adaptable and able to creatively solve business needs by designing an enjoyable user experience.

Development Projects

Coffee Project

Interactive coffee menu with custom aesthetics. A simple web application utilizing Vanilla JavaScript to provide a dynamic filter, sort, and edit feature, along with CSS for a custom chromatic color scheme.

Cipher Blog

An easily digestible blog application served up in a minimal user interface built with CSS. Featuring Google Auth for user login, full CRUD capabilities for posts made functional by JavaScript, and a database powered by Java, SpringBoot, and SQL.

Movies Project

Browse and modify a custom-built library of your favorite movies. A web-based application constructed via pair programming, using JavaScript for search and edit functionality, CSS for element positioning, and Bootstrap for an overall clean universal theme.
