Astute, results-oriented military professional with years of progressively higher experience in providing global and national logistics for the U.S. Navy across multiple platforms. Experienced technical supervisor skills, directing and training employees in day-to-day activities and working as a team or as an individual in high-stress environments. The individual is a motivated autodidactic Full Stack Developer who seeks the challenge of creating software that will impact the user's problem domain.

Technical Skills

Front-End/ Back-End Developer - HTML5 - CSS - Bootstrap - Javascript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Agile Development - Test Driven Development - Version Control with Git - Paired Programming - NodeJs - ExpressJs - Typescript - C/C++ - Algorithm Design - Database Design - Troubleshooting and Debugging

Development Projects

Network

Where finance meets social. Network is a financial application that connects other crypto and finance enthusiasts with the ability to share news and events happening in the financial space. Network sets itself apart by allowing open dialog between users free of administrative censorship and allowing the user to build an authentic network. This project collaborate with team of 4 members. The technologies used in this project are HTML, CSS, Bootstrap, Javascript, Java, Spring, and MySQL. The application was deployed on Amazon Web Services (AWS). The API consumed by this application are Coingecko for real-time crypto data, Filestack for image and video uploads, and ChartsJs library for graphical representation of user data.

Weathermap Forecast application

Weathermap allows users to view a 5-day weather forecast for any city. The user has the ability to search different locations for weather forecasts. This application features a map location for the region searched. This project was completed as a pair program project utilizing HTML, CSS, Bootstrap, javascript, and JQuery. The APIs used in this project were Mapbox API for map data and visualization, and Open Weather Map API for real-time weather data.

Cineplex

Cineplex is a website that shows the user's favorite movies with descriptions and poster images. The Movies web app contains the functionality to add, edit, or delete movie data from the database. This web app uses the IMBD API to populate movie data such a titles, images, and movie descriptions. Technologies used are HTML, CSS, Bootstrap, javascript, and JQuery.

Professional Experience

EXP Realty

Real Estate Agent | Feb 2018 - Jun 2022

- Managed personal and team member database pipeline of over 500 clientele ensuring each is properly being followed up. As a team, we were committed to pushing new clients to existing clients to pending sell and closed. Creating a consistent experience for the customer.
- Negotiated and conducted a comparative analysis of the market conditions, prices, mortgages, legal requirements, and related matters ensuring that 100% of contracts met TREC standards and closed on time.
- Prepared legal documents such as representation contracts, purchase agreements, closing statements, deeds, and leases. In addition to coordinating property closings, overseeing the signing of documents, and disbursement of funds.

Military Experience

United States Navy, Fort Worth, TX

Purchasing Supervisor | Sep 2015 - Jan 2018

- Meticulously managed and tracked over 300 credit card purchases worth \$250K. Detail-oriented action led to the Operations Department receiving the highest possible outstanding grade with zero discrepancies during the Procurement Performance Management Assessment Program (PPMAP) by Naval Supply System.
- Cross-functional collaboration in managing a Naval Intel Headquarters Command's \$10M supply budget for 5 Regional Commands and resolving service contract discrepancies that resulted in achieving a final obligation rate of 99.94% exceeding the year's goal of 99.7%.
- Coordinated contractor and vendor transactions, maintained open purchase and contract files, processed inventory discrepancies, and processed stock levels. Strategically solved discrepancies using complex problem solving skills by performing causative research on bulk inventory.

United States Navy, Everett, WA

Logistics Specialist | Sep 2011 - Jan 2015

- Led and provided mentorship to a team of four sailors to ensure maintenance of the general supply room, accounting for over 13K line items valued over \$3M with zero administrative discrepancies. Through our teamwork, we managed over 687-line items worth over \$10M as Depot Level Parts manager. Follow the naval culture of leading by example.
- Directed comprehensive logistical and reverse logistical functions for product life cycles, including acquisition, distribution, internal allocation, delivery, recycling, reuse, or final disposal of resources.
- Conducted and reviewed audits for logistics activities, such as storage, distribution, or transportation.

Education

Columbia College

Sep 2020 - Aug 2022

Associates in Computer Information Systems

Completed two years of undergrad in Information Systems.

Codeup

Jul 2022 - Jan 2023

Full Stack Software Developer

An accredited, fully immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours coding experience with expert instruction in software development.
