Highly experienced and enthusiastic Software Engineer with a passion for problem-solving and building cloud-native solutions. Proven track record of successfully developing and deploying reliable and scalable solutions in Agile environments. Experienced in data-driven architecture, microservices architecture, and RESTful APIs. Proficient in SQL, NoSQL, In-memory stores, CI/CD, and GitLab/GitHub. Seeking to apply my technical skills and experience in a challenging and dynamic role with Sportradar. Technical Skills HTML - CSS - Bootstrap - JavaScript - TypeScript - Node.js - React - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - MongoDB - PostgreSQL - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming - CI/CD - GitLab/GitHub

Technical Skills

HTML - CSS - Bootstrap - JavaScript - Node.js - Express.js - React - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - MongoDB - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

[Favorite Movies](#)

As part of the Favorite Movies project, I developed a web application that allows users to create a personal list of their favorite movies. Users can add movies to their list by searching for them by title or by browsing through a list of popular movies. The application utilizes a database to store each user's movie list and allows them to view, add, and remove movies from their list. This project demonstrates my skills in web development, database management, and user experience design.

[Weather Project](#)

I created a weather web application as part of a project at Codeup. The application allows users to search for the weather and view a map of any location they enter. It utilizes API calls to retrieve real-time weather data and map information. This project demonstrates my skills in API integration, web development, and user experience design.

[Venued.us](#)

Venued.us is built on the Spring framework and is designed to be secure, reliable, and scalable. The application is written in HTML, CSS, JavaScript, Java, and MySQL and utilizes Bootstrap, jQuery, multiple API's, and a mail service for a smooth user experience.

Military Experience

U.S Army - United States

Squad Leader / Jan 2009 - Sep 2018

- Accountable for the welfare, fitness, morale, and discipline of 12 to 30 Soldiers
