## Technical Skills

HTML, CSS, Bootstrap,  
JavaScript, jQuery,  
Java SE, Java EE (Servlets, JSP),  
Spring, Thymeleaf, MySQL,  
Object-Oriented Programming,  
Test-Driven Development, Version  
Control with Git, Paired Programming

## Education

### Codeup Jan 2023

A fully-immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development

A professional with a clear focus on making the transition from the telecommunications industry into software engineering. My experience has demonstrated expertise in workflow planning, customer support, and customer communications. I want to land a job as a software engineer where I can utilize my skills in CSS, HTML, MySQL, Spring and Project Planning.

## Development Projects

### [VibeCheck](#)

Users of the social media app VibeCheck can make and evaluate music playlists to climb leaderboards and show off their excellent musical choices. The Spotify API is used for music library access in this full-stack project, which makes use of all the technological competencies specified.

### [Coffee Project](#)

An application that enables users to add their own brand of coffee, sort coffee inventory by kind and roast, and browse coffee inventories. For the creation of a responsive environment for online and mobile devices, HTML, Bootstrap, and CSS were used.

### [MovieDb](#)

This application pulls a list of movies from an API for a movie database, and then shows movie information and movie posters. Users can add their own movie posters to the list and rate or remove films from the retrieved list. Along with HTML and CSS to display and style the data, Javascript, jquery, and the movie database API were utilized to make and deliver AJAX queries.

## Professional Experience

### **Cox Communications, INC** - North Las Vegas, NV *Network Technology Technician* / Mar 2017 - Mar 2022
