HTML, CSS, Bootstrap, JavaScript, Java SE, Java EE(Servlets, JSP), Spring, Thymeleaf, MySQL, Object-Oriented Programming, Test-Driven Development, Version Control with Git, Paired Programming

Education

Codeup

Currently Attending

Aug 2022 - Jan 2023

A fully-immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development

Web Developer with over 4 years of sales experience and managing teams of people. Combining leadership and sales experience with an ambition for challenges, I believe I can excel in working with teams to build software applications in the future.

Development Projects

[SquadUp - Group Final Project](#)

Find friends online so you never have to game alone. Add platforms and games easily, and be instantly matched with potential new friends. Once friends have been accepted, create squads and chat all on the same site. SquadUp uses HTML, CSS, JavaScript, Bootstrap and jQuery, along with a backend built with Java and Spring Boot communicating with a MySQL database. Chat functionality is powered by WebSockets so the user can chat seamlessly without having to refresh the chat page.

[WeatherMap Project](#)

I built a web application that exhibits a five forecast and drops a marker on a city searched by the user. Used OpenWeatherMap API, HTML, Bootstrap, JavaScript, and jQuery.

[Baby Blog - Spring Blog Twist](#)

Using the Spring Java Framework, HTML, CSS, Bootstrap, MySQL, and Thymeleaf, I developed a fully functional blog-like application to write notes to my son, having full CRUD functionality on my posts and allowing me to save them to a MySQL database.

Professional Experience
