 [GitHub/AlvinMckenzie](https://github.com/AlvinMckenzie)

Focused and quick-learning Army veteran and Web Developer with experience in computer science, programming, and UX design for various projects. Experienced with cutting-edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

Coffee Shop Website: <https://github.com/a-and-d-pair-programming/a-and-d-coffee-project>

Coffee website that allows users to view, edit and add a variety of coffees. Users can search for coffee by blend or roast and it is all displayed beautifully on the web page.

My role on the project was to design and code the ux/ui using bootstrap, HTML and css.

Other methods used on the project: JavaScript, jQuery

Weather App: https://github.com/AlvinMckenzie/codeup-web-exercises/blob/main/weather_map.html

Weather App that creates a 5 day forecast base on your location or location that you search. I designed this app using Mapbox API, OpenWeatherApp API, JavaScript, OpenWeatherApp API, HTML, css, jQuery, Bootstrap

Movie Website: https://github.com/Maikel-Alvin-Movie-Project/Movie_project

Movie website/app that allows users to add, edit and delete movies as well as rate them.

My role in this project was writing the Javascript code for the fetch and patch request and the code to display and update the movie list from the Json server on Glitch and pulling the movie posters from the omdb api.

Other methods used on this project: HTML, css, jQuery, Bootstrap
