

Cayden Simler

simler.cayden@gmail.com • 808-729-0331 • github.com/caydensimler

Full-stack PHP and JavaScript developer transitioning from 4+ years in the service industry. Ecstatic to be able to dive into the amazing world of development, and to obtain new and incredible languages/technologies to drive the internet forward. Front-end development and clean UI design are my passions.

Skills

Front End Development

- HTML, CSS (SASS), and Bootstrap
- JavaScript with compliments of jQuery
- AJAX and JSON
- API Integration
- Hammer.JS

Back End Development

- PHP
- Laravel
- MySQL
- Linux Command Line

Additional Skills

- Git/Github
- Excellent writing skills as well as customer service and relations experience
- Adobe Photoshop CS6
- OctoberCMS

Projects

HealthEPet • March 2017 • <https://github.com/HealthEPet/healthepet>

- Built using custom jQuery and Velocity.js animations, HTML, CSS, PHP (with Laravel), and MySQL.
- An application that caters toward veterinarians that are moving from paper filing to electronic filing of shot records. It bridges the gap between pet owners and vet clinics in order to provide an open hub of information about a pet.

Ad-Lister • April 2017 • <https://github.com/AdlisterJJC/adlister.dev>

- Created using HTML, CSS, and JavaScript for styling, as well as PHP and MySQL for infrastructure. Special attention payed to mobile responsiveness and UI design for a cleaner, more comfortable experience.
- Web-application designed to host products for buying and selling styled after Craigslist.

Education

Codeup • February - May 2017

- A fully immersive, four month, 536 hour course designed to create proficiencies in full-stack web development technologies.

University of Pittsburgh • October 2014 - December 2015

- Studied Computer Science which included the basics of software development and network architecture.

Work Experience

Software Developer • TicketIQ • September 2017 - March 2018

- Implemented the OctoberCMS to create a new platform for the company to integrate with the TicketIQ API.
- Designed new features for the site using external resources provided by other large scale companies.

Server • Las Palapas • March 2016 - September 2017

Trainer/Server • Applebee's • October 2014 - March 2016

- Trained 10+ new employees to be well versed in menu and customer service knowledge, while maintaining a positive workflow of personal tasks related to the restaurant.
- Established an enjoyable experience through impeccable customer service and the ability to multitask when under heavy workload. Skillfully anticipated and addressed guests needs and requirements.
