Projects

The World Lottery - Sep. 2017

A full-stack application that hosts various lotteries in order to raise funds for charitable organizations. Functionality and features:

- Registration/Login authentication.
- Automated drawings using back-end logic.
- Admin and super admin functionality.
- Live chat.
- Virtual wallet.
- Suggestion box with voting system.
- API for current global exchange rates.

Created using PHP within Laravel framework, JavaScript and jQuery.

Street Simon - July 2017

Web browser version of the classic simon game with a Street Fighter twist. Functionality created using JavaScript and jQuery. Styled with HTML, CSS and Photoshop.

Inventor Center - Aug. 2017

A craigslist clone modified to market inventions. Functionality created using vanilla PHP, JavaScript and jQuery. Animation created through HTML5 Canvas.
