ABOUT ME

I'm a hard working, creative, and fast learning software developer. I'm a minimalist at heart, and strive to incorporate that in my programming by writing clean and efficient code. My strong client service background has taught me what customers want to see, and my experience in development has shown me how to build it. I look forward to working in an environment that integrates these two areas, while continuing to sharpen my skills.

PROGRAMMING SKILLS

Java - Python - Javascript - HTML - CSS - MySQL - Express - jQuery - ES6 - Node.js
Spring - NPM - API's - Git - CLI - Github - Ajax - IntelliJ - Sublime - Mobile Responsive

RECENT PROJECTS

Proptax 6/18

An automated program written in python for gathering data and lead generation. The program utilizes web scraping with the selenium and webdriver python modules.

Omelette.tech 5/18

A full stack web app to help chefs build a portfolio of abilities, and restaurants to find employees faster. Built using Java and the spring framework, and a MySQL database.

Personal Blog 4/18

A minimalist blog built with Java, the Spring framework, and a MySQL database. Styled with custom CSS, flexbox, and bootstrap 4.

Weather Map: 3/18

An easy to use weather application, built using HTML, CSS and Javascript. The application pulls up to date weather info from the Weathermap API.

PROFESSIONAL EXPERIENCE

Private coding tutor - Current

Tutoring students in basic front end development, with a focus on html, css, and javascript.

Freelance Software Developer and Consultant - Current

Consulting and creating front end web design and backend software for a range of industries.

Stitch Fix - Client Services Representative - 5/16 to 5/17

Provided an individualized, friendly, and professional response to a range of client inquiries. I exceeded my daily goals to help maintain an ideal SLA, and helped identify opportunities to improve the client experience.

Facebook - Ad Risk Analyst - 5/15 to 5/16

Examined and implemented reviewing standards on a massive scale of structured and unstructured data. Studied trends to catch advertiser schemes as they arose, to boost response times. Worked with teams to discuss new strategic reviewing processes.

Hosteling International - Front Desk - 8/13 to 6/15

Assisted international guests with check in and reservations via phone and email. I also provided recommendations and knowledge around the area to help guests enjoy their time in the city, and assisted in social media management.

Protect America - Service Technician - 2/09 - 6/13

Assisted new and existing clients with the installation of their home security system. Provided existing customer relations and service, maintenance of existing security systems, and additional product sales. Consistently a top producer.

RELEVANT EDUCATION

Codeup - Certificate Of Completion - 2017-2018

Codeup is a fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.
