

Lynette Barrera

Software Developer

About Me I enjoy the practice of creating and utilizing my knowledge in mathematics to solve problems. Software development marries these two perfectly to construct a field I am excited to be in. In this ever-changing landscape, I can rely on continuing to learn and grow to produce aesthetic functionality one line of code at a time.

The old classic memory game where you must follow the pattern of lights for as long as you can.

Weather Project - February 2018

An up to 5-day weather forecast accomplished using Open Weather Map and Google Maps APIs.

Professional Experience

H-E-B

Jul 2018 — Present

Developer I

As a Developer I, I leverage detailed specifications and Center of Excellence (CoE)-approved languages and developmental tools to assist experienced developers in coding / configuring, maintaining, testing, and debugging modifications to existing applications; or executes the same in the development of new applications.

City of San Antonio

Feb 2015 — Jan 2018

Development Services Specialist

As a Development Services Specialist, I responded to customer inquiries regarding residential and commercial development and processed development related applications, such as zoning and platting that came in on a daily basis.

Bexar BiblioTech Digital Library

Aug 2013 — Feb 2015

Technology Assistant

As a technology assistant at BiblioTech Digital Library, I led an outreach team of three where we conducted community events and presentations to inform the general public about BiblioTech's services. I was also the lead in teaching students, ages 10-14, in a short introductory course exposing them to C# using PluralSight.com.
