## Summary:

I've always had a passion for solving problems and figuring out ways to help others. Starting a career in software development it has really opened my eyes to many amazing possibilities. In this continuously changing career field there is plenty of room for self growth with a endless amount of possibilities. I enjoy writing code and finding solutions for any challenge. I'm a fast learner with a passion for learning new technologies and languages.

## Technical Skills:

HTML - CSS - Bootstrap - JavaScript - jQuery - Java - Apache Tomcat - Spring Framework MySQL - GitHub - Linux - NPM - AutoCad - Windows - Mac OS - Adobe Creative Cloud - Exposure To: PHP - Python - iPython

## Projects:

### Orienteer

This website will be a standalone geocaching application where users can participate in geocaching adventures by finding or hiding geocached stashes.

### Weather Map

I used the google API for the geolocation feature, which allows me to drag and drop a marker on specific location coordinates.

### Coffee Project

With a team we created a fully featured coffee shop. This application allows users to choose a specific type of coffee and allows them to search through the already established inventory list.

### Ad lister database

This was a model of a Craigslist clone. I worked with a group to develop a mobile responsive website that allows the user to register with a simple form. This application also allows existing users to create, delete, and modify existing ad posts.

## Education:

### CodeUp Full-Stack Web Development Bootcamp: March 2018 - July 2018

Fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.

### NorthWest Vista College: September 2015 - December 2017

Mechanical Engineering

HackerRank: March 2018 - Present

A place where programmers from all over the world come together to solve problems in a wide range of Computer Science domains such as algorithms, machine learning, or artificial intelligence, as well as to practice different programming paradigms like functional programming.

Experience:

U.S NAVY E-4 (Culinary Specialist): January 2011 - September 2014

Maintain food inventory and accounting records. Managed food budget, to include preparing meals for a crew of 400+ personnel, 4 times a day. Selected to prepare menus and food for senior personnel, military officers and government officials. Was the supervisor for a group of 12 cooks.

Bandera Bowling Center: June 2017 - February 2018

Front Desk

Responsibilities include but not limited to answering multi-line phone, greet patrons in a friendly manner, assign lanes for leagues and open play, collect bowling fees and shoe rental, follow all cash register procedures, ability to use a public address system to start leagues, and ability to give direction.

Mechanic

Serviced and performed preventive maintenance procedures on all bowling equipment. Performed major rebuilds and overhauls of equipment as necessary. Participated in planning servicing/maintenance budgets and preparing major improvements and repair programs. Maintains accurate records of parts, costs and machine performance. Train and oversee hourly pin chaser employees.
